Tie Breaking Formula

Should ties occur between teams, standings will be decided according to the following priorities:

1. The team with the best win loss record in the game(s) between or among the tied teams will place higher in the standings.
2. If the tie persists, the final placement of teams will be dictated by the ratio of number of runs per defensive innings for games between or among the original tied teams.
3. If the tie persists, the final placement of teams will be dictated by the ratio of runs scored per offensive inning for games between or among the original tied teams.
4. If the tie persists, the team having the best win loss record of games played versus the highest placed team not in the tie, followed by comparison against the next highest placed team, etc. will place higher in the standings.

Notes:

- a. When a multiple tie occurs and is only partially resolved, the remaining ties will be resolved by continuing with remaining tie breaking priorities until all 4 priorities have been exhausted. Then, and only then, will the remaining tied teams return to priority #1 and proceed through the order again.

Example:

Barnaby River, Semiwagon Ridge, and Grey Rapids all tied after the completion of the Round Robin.

Priority 1:

River defeated Ridge 6 - 3

Rapids defeated River 6 - 4

Ridge defeated Rapids 10 - 8

No tie resolved, move on to priority 2.

Priority 2:

River 9/14 - 0.643

Ridge 14/14 - 1.00

Rapids 14/14 - 1.00

River emerges from the tie but other 2 move onto priority 3.

Priority 3:

Ridge 13/14 - 0.929

Rapids 14/14 - 1.00

Rapids emerge from the tie.

- b. If priorities 2 and 3 are put into effect (defensive or offensive ratios), innings will be calculated on a fractional basis when calculating the number of defensive or offensive innings to be credited to each team.

Example 1:

If the home team wins in the bottom of the 7th by scoring a run with none out, the visiting team would have 7 offensive innings and 6 defensive innings while the home team 6 offensive innings and 7 defensive innings.

Example 2:

In a mercy rule ball game, the winning team will get credit for 7 defensive innings while the losing team will only get credit for innings played.

Example 3:

If the home team wins in the bottom of the 7th by scoring a run with one out, the visiting team would have 7 offensive innings and 6 1/3 defensive innings while the home team 6 1/3 offensive innings and 7 defensive innings.
