House League Coaching Manual

This manual is intended to provide information and assistance to help you in your goal of becoming a better baseball coach.

I am sure we all agree that our collective goal is to promote the growth of baseball in Whitby. By volunteering to coach you are helping us towards meeting this goal! By providing better coaching, our players will benefit that much more, and in turn will become better players.

Whether you are coaching for the first time, or you are a returning coach, the first step to becoming a better coach is to understand that no matter how long you have been coaching, you will never stop learning. Please use this manual, along with the knowledge you already possess, to promote a fun filled and educational program that each of your players will enjoy.

In addition to the resources provided here, if you would like help contact your convener to arrange for someone to visit at a practice and/or game as available.

Have a great season, and thank you to your commitment towards better baseball in Whitby!

Fair Play Code For Coaches

1. I will teach my athletes to play fairly, demonstrate good sportsmanship and to respect the rules, the equipment and ball diamonds, officials and opponents.
2. I will remember that children play to have fun and must be encouraged to have confidence in themselves. I will also remember that young athletes have other interests and obligations.
3. I will remember that children need a coach they can respect. Therefore I will be generous with praise and also set an example of good sportsmanship.
4. I will ensure that all athletes get equal instruction and support as well as fair playing time.
5. I will not ridicule or yell at any baseball player for making mistakes or for performing poorly. I will show umpires the same respect.
6. I will make sure that equipment and facilities are safe and I will encourage a litter-free environment.
7. I recognize that coaching is a commitment and I will endeavor to improve my coaching skills.

Coaching Basics

Thank you for agreeing to coach a group of athletes who need a coach to enjoy everything that sport has to offer: fun, competition, friendship, and personal growth.

Thank you for taking the time from your personal schedule to devote to the development of young people who will benefit from your presence, your planning, your teaching, and your personal involvement in making sport a fun place to be.

Thank you for accepting the responsibility of helping young people become better athletes, for keeping them safe and helping them feel good about themselves and what they do.

Thank you for caring enough to seek some help in getting started. The first step is the hardest, but you'll find lots of help along the way. As you continue coaching, the 3M National Coaching Certification Program (NCCP) will help you develop your skills as a coach.

If you get the impression we're glad you're here, you're right - we are!

We've created this introductory course to help you take the first steps in coaching. Here you'll find the basics of coaching, especially coaching young athletes, as well as links to more detailed information sources, programs and courses. You'll also find links to Ontario's sport organizations, who will help you obtain more information on the technical aspects of coaching your specific sport. Please feel free to print and circulate this information!

Your Role as Coach

People become coaches for many reasons: because they have a child in sport, because they were an athlete themselves, or because they want an opportunity to help in their community. Some coaches step forward; some are asked to help. No matter what the reasons, all coaches have the same roles. You will be a teacher, a leader, an organizer and sometimes will even act as a counselor.

Coach has a nice ring to it. It sounds important. It is important. Think back to some of the lessons your coaches taught you. Perhaps you remember the importance of trying your best all the time. Perhaps you remember how important team goals and sportsmanship were. Perhaps you were taught how to solve problems or you were excited about learning new things. That coach made a difference in your life. You too can make the sport experience meaningful, fun, and memorable. That's why you're here. When your reasons for coaching match the needs and development level of your athletes, everyone can win.

In your role as a teacher, you will be asked to share your knowledge of the sport and prepare athletes to play by improving fitness and developing skills specific to your sport.

In your role as leader, you will make many decisions, to motivate your athletes and help them set and attain goals.

In your role as an organizer, you will manage practice and game schedules for the team, plan and evaluate practices and evaluate athletes.

In your role as a counselor, you will listen to and provide guidance and support for your athletes.

It is important to understand that athletes, like coaches, participate for different reasons. Some enjoy the sensation of speed, power, or grace. Some athletes just want to be with their friends, or be a part of a team (social reasons). Some athletes want to win, to improve themselves or advance to high levels in their sport (achievement reasons).

Match your reasons for coaching with the reasons that athletes participate. A coach who is driven to win, coaching a team of 7 year olds who are there for fun and social reasons, can result in an unhappy coach and unhappy athletes.

Make Sport a Fun Place to Be

In sport, we need to foster the willingness to try new things, to take risks, to test potential. This is best accomplished in a supportive, encouraging atmosphere that is characterized by praise not criticism, full of rewards not punishment. Rather than saying "That's the wrong way to do it...!" try saying "You've done this part well, now let's see if we can add ...". Try to catch your athletes doing something right not something wrong.

Sport should be fun. Fun doesn't mean that athletes need to laughing and giggling all the time. Part of the fun is challenge that is realistic and encouraging. Part of fun is playing - playing the game or playing at parts of the game. Fun is not standing in line waiting for your brief turn at an activity. Fun is being actively involved. Fun is being respected for yourself and your particular talents. Fun means freedom from negative criticism and harassment. Fun means that we all count as part of the team. Fun means that we play the game fairly, not to bend the rules or break them to gain an advantage. Fun means having a sense of satisfaction that what you are involved in is gratifying and worthwhile. Fun is what your athletes should expect from you. Fun is what you should expect now that you are involved in coaching.

As a coach, you are an equal partner in making sport fun - you should neither be overly authoritarian nor merely a passive observer.

Growth and Development

While it may be stating the obvious, it helps to remember that children are not miniature adults. Kids develop in stages and have differing physical and mental capabilities at each stage.

The sport system divides athletes by age groups, but age is not the only measure of their maturity or readiness for a specific sport activity. Not all 10 year olds are alike. Some are more mature physically, mentally, and socially while others are less mature. You may have on your team two or three groups of athletes who are quite different emotionally or physically even though they are the same chronological age. You may have to create activities appropriate for the different groups on your team.

As the athlete grows, develops, and matures their approach to sport will change. In general, the following is true about the young athletes you coach:

Children under 7-8 are motivated by fun and often dislike competition.
Cooperative games are very useful

Children 8-10 begin to understand the importance of rules. They identify with personal prestige and skill levels more than winning or losing. They become more self-centred.

Children over 12 become more competitive. Winning and losing become more important.

Physical abilities change dramatically with maturity level.
The ability to translate commands into action changes dramatically with maturity.

Asking kids to do things that are beyond their developmental capacities frustrates both athletes and coaches. Contact your sport organization or the Sport Alliance of Ontario to access resources which will help you develop appropriate programs for your athletes.

Create a Strong Self-image

How athletes feel about themselves (self-image) is important. If they don't feel good about themselves in a particular setting they avoid that environment – they quit sport, or do not perform to their potential. You play a large role in the development of an athlete's self-image. It's quite easy, really: do the things that others do to you to make you feel good.

Know their names and use them (first names) when addressing them

Establish eye contact - kneel don't bend

Smile - often and readily

Give approving nods, winks, thumbs up

Develop a list of 100 ways to say "Way to go!"

Applaud effort not just results

Be enthusiastic, energetic

Involve them in decisions

Let athletes assume leadership in an appropriate situation

Spend time with everyone

Give them responsibilities

Be their biggest fan/cheerleader - remind them of their achievements

Treat them like you'd like to be treated when you are learning or being evaluated on some new task or skill.

Organize a Great Practice

World-class coaches have both annual and daily plans for their practices. They start with a script of what will be done, how it will be done, and why it is being done. Like them, you should have seasonal goals for what you want the team, the individual athletes, and yourself to accomplish.

You need a plan for your daily practices, too!

It is extremely important to have a plan when you coach beginning athletes. They don't have a lot of experience or skill to draw on and if this is your first time coaching, neither do you. If you know what you want to do, when you want to do it, how you want it done, and why you want it done, you will be much more confident and assured- and so will your athletes.

Plan the Practice

To begin, break your practice down into five to ten minute segments following this order:

Introduction:

explain briefly what will happen today, what they will learn.

Warm-Up -

get athletes moving, get them ready for activity
raise body temperature through vigorous activity
start slowly then increase pace
dynamic stretches
basic warm-up for your sport

Review previously learned skills -

utilize drills that give them an opportunity to practice fundamental skills or skills that they learned recently

Learn new skills -

describe the new skill
pick 2-3 teaching points to emphasize
provide drills that utilize the new skill
make sure everyone gets to participate (learn) - avoid long lines of standing around
provide feedback - and encouragement
Change or modify skills as athletes improve

Game-like Activities and/or Conditioning –
simplified game situation – reduce area of play, number of players, rules
incorporate fitness activities if appropriate

Cool down –
decrease level (intensity) of activity gradually
static stretches for the muscles most used in the activity

Wrap up –
review practice and plan with athletes
prepare them for next practice
do your own personal evaluation – what could be better next time?

Don't Just Practice – Practice Effectively!

An effective practice session has the following characteristics

High Activity Level:

Every athlete participates frequently. There is little standing in line, no waiting for equipment, minimal time listening to instruction.
Drills and activities change frequently, athletes do something new every 5-10 minutes
Drills have progression – easy to hard, simple to complex

High Variety Level:

Skills are practiced in different ways
Fun activities are provided
Novelty is introduced – play new position, change rules, use different equipment
Work with different people, individually, pairs, small groups

High Organization Level:

Written practice plan
Environment is organized – enough equipment in the right place before practice starts
Start, stay, and finish on time

This may seem like a lot of work, but once you've tried it once or twice, it is quite simple and both you and your athletes will benefit.

PLAN FOR GAME DAY

You should also have a plan for game days or competitions:

Warm up -
prepare them for game activity as you would for practice

Establish what we want to do today –
play fair
good sportsmanship
do our best
tactics and skill reminders: good passing, good defense, etc.

Post-competition wrap up -
Highlight the positive things that happened

Praise effort - be positive

Ready them for next practice

Evaluate the game

- make note of performance and accomplishments

- make note of things to be addressed at next practice. Highlight the positive things that happened

Good Coaching Needs Good Communication

Communication is not merely giving instructions and having athletes carry them out. Effective communication is a two way street. You are both the sender and receiver of information. That means that not only do you need to be understood when you communicate, but you also need to listen to the people you communicate with. Listening skills are as important as speaking skills. Here are some helpful hints.

When speaking:

- Use words the athlete understands (remember growth and development needs)

- Don't speak too quickly

- Make sure that they are paying attention to you

- Get down to their eye level

- Make sure everyone can hear (speak loudly enough, face them when speaking)

- Make sure they understand (ask them to state what you've asked them to do)

- Repeat yourself if necessary

When listening:

- Establish eye contact

- Give signs that you are paying attention (uh huh, yes, I see)

- Have the rest of the group quiet

- Restate or rephrase what you've heard (you want to know what to when...)

- Be positive

- Thank them for asking the question or making a point

When you give feedback:

- Be prompt- give feedback while the athlete still remembers what they did

- Be positive- start by mentioning what they're doing well

- Be specific- explain exactly how to make the improvement

- Be sensible- don't ask for changes the athlete is not capable of

- Make sure the athlete understands- ask them to repeat or demonstrate

"That was good! You've got the arm action. Now let's work on the step - you need to point your toe like this. OK? Ready to try it again?"

Help Your Athletes Get Fit

Even people who are new to coaching recognize the need for athletes to be fit in order to play the game. In fact, it may be one of the first things you try to do. However, getting athletes fit isn't just a matter of making them work until they drop from fatigue. Fitness development needs to be age (developmentally) appropriate, progressive and should not predispose the athlete to injury.

Here is a list of some basic do's and don'ts for getting your athletes fit.

- Do - Progress gradually over the season. Start with lower intensity, lower duration activities and work up over time.
 Build endurance first before introducing higher intensity activities (run continuously before sprinting).
 Put the fitness part of practice near the end after they have tried to learn new skills. It's more difficult to learn skills when fatigued.
 Always include a warm-up (see above).
 Monitor athletes and reduce or stop activity as they become fatigued.
 Provide plenty of cool water--particularly if the activity is intense or if it is hot and humid.
 Scale back intensity in hot, humid weather.
 Always have a 'cool-down' period at the end of practice (see the earlier section).
- Don't - Ask athletes to perform extreme stretches, hyperextensions or rotations, e.g., neck bridges, hurdle stretch.
 Ask developing athletes to do strengthening activities that require them to lift or support more than their body weight.
 Ask developing athletes to perform high intensity activities such as repeated wind sprints.
 Don't deny your athletes water and rest breaks.
 If you see your athletes only once or twice a week, don't sacrifice skill development for fitness training. You may be better off teaching technique and fundamentals of the game.

How to Make Sport Safer

Every coach wants to minimize the risk of injury to athletes. We can't totally eliminate the risk of injury but we can reduce it drastically. Many risks are under your control- and you have a responsibility to take the necessary steps to protect your athletes. Once again, it helps to have a plan.

- If your athletes use equipment (sticks, bats, etc.) be sure to teach them how to handle the equipment safely.
- Always survey your practice/game facility. Hazards are often simply overlooked until an accident happens.
- Make sure they have proper, well-fitting athletic wear (shoes, helmets, shoulder pads, skates, etc.)
- Remove obstacles or hazards. Move benches back a safe distance from the playing area.
- Pad objects that athletes may run into (end walls of gym, basketball standards, volleyball support wires).
- Provide plenty of water (particularly in warm weather)
- Have a first aid kit on hand
- Have a medical information form for each your athletes' past injuries, allergies, conditions, that may affect their ability to participate.
- Know your athletes' fitness, illnesses, etc.
- Be cautious returning athletes to activity when they have been injured or ill.

For You

It is beyond the scope of this project to teach you how to deal with injuries if they should occur. However, there are lots of places to go for help that will prepare you to deal with most of the sports injuries you will encounter. Red Cross, St. John's Ambulance, SIPAC (Sports Injury Prevention and Care), and the 3M NCCP Level I Theory manual are good sources of information and training.

What to do When Things Go Wrong

When things go wrong and there is a major injury, you must have an EAP (Emergency Action Plan). Take time to create one before your next practice. The plan includes the following:

- Location of the nearest phone
- Phone numbers of ambulance, hospital, etc.
- Clear directions for emergency care people to get to where you are

Having a "call" person (the person who makes a call) to get help

Having a "charge" person (the person in charge) to stay with the athlete and be in charge at the scene.

Your Role With Parents

As a coach, you'll often have to work with the parents of your athletes. The chances are that you are a parent yourself. If that is the case, ask yourself what kinds of things would you expect of a coach when they are dealing with your son or daughter. What would you like to know about their experience as a coach? What would you like to know about the interaction between your child and the coach? You probably had those kinds of questions as a parent, however, now that you are the coach, other parents are looking to you for answers. It helps to remember that "informed people are cooperative people."

How do people become informed? In the most simple and direct way. You talk to them, one on one or as a parent group. Tell them how you are going to conduct yourself, what expectations you have of the athletes and how you will treat them. Tell them what your expectations are of them as parents.

Another way to inform parents is to write them a letter, addressing the concerns that any parent would have. Tell them a little about your philosophy, your expectations, and create an avenue of communication. Good coach-parent relationships create a positive environment for the athlete, and everyone benefits.

In Closing

Thank you once again for taking the time to review Coaching Basics. As you can see from the materials and references we have provided you with, there is a lot to learn. However, now that you have started, the most important thing is to use what you have learned to enjoy your athletes, your sport, the competition, and to have fun.

The real rewards for your efforts are not in the awarding of trophies or medals but in the words of an athlete who, at the end of the season, extends to you a heartfelt "Thanks Coach!"

Enjoy your season, your athletes, and everything coaching has to offer!

RALLY CAP PROGRAM INFORMATION

RALLY CAP

Program as a starting point for long-term athlete development

The Rally Cap Program is one of the outcomes of the Long-Term Athlete Development (LTAD) Program developed by Sport Canada.

LTAD focuses on the general framework of athlete development with special reference to growth, maturation and development, trainability, and sport system alignment and integration. It incorporates information from several sources. It draws on the experiences of various athlete development projects that have been implemented by different sport organizations since the mid-1990s.

These sciences include pediatric exercise science, exercise physiology, sport psychology, psychomotor learning, sport sociology, and nutrition. An analysis of the literature on organizational development has also contributed significantly.

The health and well-being of Canadians and the medals won at major, multi-sport competitions are simply by-products of an effective sport system.

This document is based on and supported by the coaching and exercise science literature, but it is written particularly for coaches along with technical and administrative sport leaders. Baseball Canada is proud to offer this simple and detailed program to the Canadian baseball community.

Together, let's make sure this first baseball experience is a positive one for all young athletes in Canada.

INTRODUCTION

Welcome to Baseball Canada's Rally Cap Program. This booklet provides the information necessary to run Baseball Canada's Official Initiation Program.

With the Federal Government's mandate for National Sport Organizations to develop a long-term athlete development model for each sport, the Rally Cap program was born with the purpose of making baseball more fun and engaging to young Canadians. Baseball Canada is confident that this program will satisfy young athletes, their parent/guardians and that it will be a useful tool for coaches involved in teaching baseball at the community level.

GOALS

- 1** Create a fun environment in which children and adults are actively engaged together in the game of baseball.
- 2** Develop fundamental motor skills, teach baseball skills, and basic rules to our athletes.
- 3** Experience success with an emphasis on respect and fair play.
- 4** Promote increased self-esteem among Rally Cap participants.
- 5** Recruit new coaches, parent helpers and volunteers

The Crucial Role of Coaches

The most important individual in the Rally Cap program is the coach. The coach is the person the athletes look at for instruction, encouragement, and inspiration. Assistant coaches, and/or parent helpers, take their cues from the coach. Therefore, success of the program is dependant on the coaches embracing our goals and working to achieve them.

Baseball Canada fully recognizes that the majority of coaches at this level are parents/guardians who are not only providing their children with their first experience in baseball, but they themselves, potentially, are experiencing coaching and/or baseball for the first time. Our Rally Cap practice plans are designed to provide coaches with all the necessary tools to give their athletes, and themselves, the best baseball experience possible.

The following are ways in which coaches can help achieve Rally Cap goals:

GOAL #1

Create a fun environment where athletes and coaches are actively engaged together in the game of baseball.

1. Use fun games to make baseball learning positive and fun.
2. Encourage interaction between parents and athletes during Rally Cap sessions.

GOAL #2

Develop fundamental motor skills, teach baseball skills and basic baseball rules to athletes.

1. Organize practices to maximize learning, minimize inactivity with the number of repetitions in the various skills being introduced.
2. Introduce fundamental motor skills for the all-round athlete.

GOAL #3

Experience success with an emphasis on respect and fair play.

1. Recognize the ability of each athlete is individual and progression will occur at their own rate through experience and effort.
2. Recognize partial or total success through positive reinforcement.
3. Organize activities adapted to everyone's ability, proposing attainable challenges, and giving constructive feedback.

GOALS (continued)

GOAL #4

Promote increased self-esteem among Rally Cap athletes and coaches.

1. Encourage athletes to do their best!
2. Spend comparable teaching time with all athletes no matter their ability.
3. Embrace challenges as a pathway to success!

GOAL #5

Recruit new coaches, parent helpers and volunteers.

1. Rally Cap provides an entry point to baseball for not only athletes but coaches and volunteers, too
2. We believe, that by developing coaches and volunteers, we are also developing positive role models for long-term growth in sport and life.

STRUCTURE

The Rally Cap program was developed using baseball initiation programs, as well as adding new ideas to keep athletes engaged and interested.

In the Rally Cap program, each team consists of six athletes on the field compared to nine in traditional baseball. This allows for the formation of more teams, meaning athletes will have more skill repetitions at each session to maximize skill repetition and acquisition.

Each Rally Cap session lasts 60 minutes involving three teams. Two (2) teams will play a 6 versus 6 (6v6) baseball game while the third team will be participating in baseball activities in the outfield area. After an inning is played (both teams have batted) in the game, teams will rotate so at the end of the 60-minute session each team will have played two games (two full innings) and had a skill-based practice.

THE GAME

All athletes will come to bat during their team's ½ inning. The ½ inning will end when all athletes have completed their turn.

Teams will score runs the same way they do during a traditional baseball game (i.e., touching home plate). Teams also can “score” runs while playing defense. A run can be earned by catching a fly ball or by throwing a runner out at a base. Therefore, up to six (6) defensive runs can be earned each inning.

VARIATIONS: *You can develop a different scoring system to reward different types of defensive plays (e.g., you can allow more points for fielding a ball followed by an accurate throw).*

To throw a runner out, the batted ball can be thrown or run to **any** base before the batter-runner reaches 1st base.

There are no walks, no strikeouts, no base stealing, and runners can only advance on batted balls.

With hitting being the most fun part of baseball, the Rally Cap program has been designed to help athletes hit the ball no matter what their skill level. Three different formats can be used:

BATTING TEE / COACH – PITCHER / PITCHING MACHINE

Each player can choose the format they wish to use, with coach discretion, depending on their development stage. All three formats can be used during a game.

Each batter will have a maximum of five (5) baseballs to hit during their at bat. If the ball is not hit, a coach will roll the ball to allow the batter to run the bases and to allow the defense to field the ball and make plays.

When the last batter of the inning hits the ball, the ball must be thrown to home plate to get the batter out.

The batting order will change each time a team comes to bat (first batter becomes last, etc.) Defensive positioning will also change each time a team comes to bat.

VARIATIONS: *Baseball Canada encourages Rally Cap programs to rotate defensive athletes after each at bat, so athletes stay engaged, learn the different positions, and move throughout the inning. A defensive rotation can be third base to shortstop, shortstop to second base, second base to first base, first base to pitcher and pitcher to third base. The catcher will remain in position for their team's defensive inning.*

THE PRACTICE

In the outfield area, each team will practice different baseball activities with respect to the following **FUNdamentals**:

- 1** FUNDAMENTAL MOVEMENT SKILLS
- 2** THROWING
- 3** RECEIVING
- 4** HITTING
- 5** BASERUNNING

Baseball Canada has developed Rally Cap practice plans based on the different skill levels of the program so coaches can focus on teaching proper technique to maximize skill acquisition. To keep athletes engaged with an emphasis on multiple repetitions, Baseball Canada encourages the use of stations while teams are practicing with athletes rotating throughout.

We strongly recommend that you set up your equipment before the start of the session. The only equipment a Rally Cap athlete needs are a baseball glove and batting helmet.

THE RALLY CAP SYSTEM

Baseball Canada recommends that Rally Cap programs conduct two “Rally Cap Days” during the season where athletes will have an opportunity to “level-up” based on the skills they have practiced and acquired during the season. The Rally Cap Days are designed to be fun and an event that athletes and coaches look forward to reward

success and progression through the program.

During the Rally Cap Day event, all athletes will go through stations where they will perform different baseball skills. When a player succeeds at each skill based on a particular level of the program, they will be recognized as having passed that specific skill level.

“OFFICIAL RALLY CAP DAY”

You can have more or less of these events, but we caution to avoid progressing through the levels of the program on a daily basis. Rally Cap athletes should practice their skills throughout the season to perform on a truly unique day.

Goal: Introduction to agility using jumping as a mean. Athletes learn proper landing technique in order to jump in a safe manner.

Description: Athletes are split into teams, a line on the field is used to mark the starting point. The athletes take turns by alternating with the other team, jumping towards their opponents with a standing two-foot jump. Each jump is marked by a marker (e.g. glove or cone). Each jumper tries to push the marker further onto the opponent's side of line. The goal is to have the marker on the opponent's side after the last person has jumped.

Equipment: Small cones, markers, line on field

VARIATIONS AND PROGRESSION:

- A. Use different height and length for jumps

Description: Athletes pair up with each other or with a coach. On signal, athletes take a proper grip on the ball.

Equipment: One ball for each pair

VARIATIONS AND PROGRESSION:
